

The Dodge Group - Exterior Pylon Signs

Location Brockville, Ontario
Designer / Architect Soheil Mosun Limited
Duration May 2007 - Jun 2007

Scope - Soheil Mosun Limited was contracted to design, fabricate and deliver (2) internally illuminated exterior pylon signs.

Highlights - These internally illuminated pylon signs are constructed of aluminum with acrylic internal panels. They feature solid and rugged 1/4" thick welded aluminum frameworks with 1/8" thick aluminum cladding which is painted with heavy duty, long lasting exterior paint. The base plates are 1/4" thick aluminum and the internal light fixtures are 1/16" thick formed aluminum. The graphics are precision cnc cut with acrylic backing attached to the sign panels with #10 welded studs for durability and longevity. Both pylon signs are mounted to concrete pillars.

High quality, high durability pylon signs

Precision cut graphics on aluminum cladding
